

**IV INFUSIONS AND PHLEBOTOMY**

**PRICE LIST**

**Patient Safety**

Before your first IV Drip Therapy, a chargeable Telehealth/Zoom consultation with Aliyyaa Spring ND MRN or Maria Liberios, IV Specialist, will be scheduled to assess your general health and establish whether you have any underlying health conditions or nutritional deficiencies. If there are reasons for concern, you will not be able to continue with a treatment.

All prescriptions will be written by Dr Vasileiadis, for which there will be an additional charge.

All requests for IV Vitamin C Drip Therapy over 30gm means you will need to take a G6PD (glucose-6-phosphate dehydrogenase enzyme) test. These results typically take up to two weeks, Those with G6PD deficiency cannot have high dose intravenous vitamin C over 30gm.

Please note that all cancer patients scheduled for Vitamin C infusions will need to complete the G6PD test as standard.

**CONSULTATION FOR INITIAL INFUSION (up to 30-mins)**

With Aliyyaa Spring ND MRN or Maria Liberios £50

**PRESCRIPTION**

\*\*Not suitable for patients with haemochromatosis. Iron levels will be checked first, or proof of testing will be required.

£250

**INTRALIPIDS (up to 90 mins)**

Intralipids is used for improving implantation in IVF patients with high natural killer cell activity. It is generally administered one-two days prior to a procedure, and then once weekly for as long as it can keep the natural killer cells deactivated until the pregnancy can override the signals being sent by the immune system. (The amount of intralipids you will need is decided by IVF doctor, as each patient is different)

£175 100ml  
£200 200ml

We can offer you this providing you have a prescription

**BEAUTY AND GENERAL WELLBEING INFUSIONS**

**ANTI-AGING (up to 45-mins)**

Formulated to make you look and feel younger, the nutrients in this drip restore collagen, stimulate elastin production, brighten your skin and even your skin tone, all while hydrating your cells for that plump, youthful look.

£220

**SKIN LIGHTENING AND BRIGHTENING**

The only proven and safe skin lightening procedure to date, IV glutathione plus a high dose of vitamin C gives you an overall brighter complexion whilst maintaining a natural look. Monthly top-ups are recommended. £150

**THE DETOX II (up to 45-mins)**

Glutathione is a powerful antioxidant which cleanses your body. It is normally made by the liver but as we get older our liver makes less of it and we need it even more in our system to help rid metals and toxins from your body. Vitamin C is vital for cell health, adds more oxygen into the body and protects your cells from free radicals. £150

**SPORTS (up to 45-mins)**

This nutrient drip is packed with energy-boosting vitamins that naturally enhance and boost your performance. This improves recovery times and helps to burn off stubborn body fat. £230

**JET-LAG (up to 45-mins)**

Do you need to get back to work or feeling a little lack-lustre following travel? B Vitamins, Magnesium and more help to boost your energy levels, hydrate and reduce fatigue. £160

**INJECTIONS**

**Vitamin B12**

Vitamin B12 is a nutrient that helps keep your body's blood and nerve cells healthy and helps make DNA, the genetic material in all your cells. Vitamin B12 also helps prevent megaloblastic anaemia, a blood condition that makes you tired and weak.

£65  
**Package of 4 Available**

Symptoms of b12 deficiency include:

- . sore and red tongue (glossitis)
- . mouth ulcers
- . pins and needles (paraesthesia)
- . muscle weakness
- . numbness
- . disturbed vision
- . irritability/low mood/brain fog

If you recognise any of these symptoms, please contact us for more details.

**Vitamin D**

£75

Vitamin D is a fat-soluble vitamin that has long been known to help the body absorb and retain calcium and phosphorus; both are critical for building bone and keeping teeth and muscles healthy. Studies have also shown that vitamin D can reduce cancer cell growth, help control infections and reduce inflammation. A lack of vitamin D can lead to bone deformities such as rickets in children, and bone pain caused by a condition called osteomalacia in adults.

Recommended 1 Intramuscular injection every 4-6 months. A fat soluble vitamin is dangerous to overdose, therefore Vitamin D levels will be checked first, or proof of testing will be required.

**PHLEBOTOMY SERVICES**

Blood draw(s) *	£45
Blood draw with centrifuge *	£65

**\*If you have more than one test kit an additional £10 will be charged per kit]**

**NB:** We accept sample kits from all laboratories. Please contact us in the first instance to ensure we have the necessary equipment to assist you.
